TESTIMONIALS.

From Mr. JOHN J. MARSH, Capilla del
Sud, June 29, 1881.—"The dip which you
sent me I used according to directions, and I
can assure you that it gave the desired result.
During four years' practical experience of
curing scab in sheep, I have seen the only one
that gives complete satisfaction. It improves
the quality and promotes the growth of the
wool. For efficiency, economy and simplicity
of application, I prefer it to any dip I have used."

From Mr. JAMES M. THOMAS, Estancia
Sud, June 29, 1881.—"Having
given a good trial to Gillard's Dip, I have
much pleasure in bearing my testimony to its
valuable quality as a Sheep Dip. It destroys
all insects with which sheep are infested,
keeps woolly in cold water, does not injure
the hands, and softens all hard parts. I shall
strongly recommend it whenever an opportu-
nity offers. As regards the claims, it
should command a good sale."

"The market is being flooded with sheep
dips, some of which are of little value,
and also by some which are worth little or
nothing. One reader will have noticed that
several preparations have been mentioned in let-
ters received from the camp showing that there are
several good preparations. I have carefully
NOTE—A sample drop will be sup-

Alcock's Porous Plasters.

Feb. 1881.

J. A. Bennett, Esq.,
186 Florida.

Dear Sir,

I have great pleasure in testifying to the
efficacy of Alcock's Porous Plasters.

My wife was attacked by Acute Rheuma-
tism in this city, for which three Doctors
who attended her could do absolutely nothing.
After being in bed for 3 months, unable to
move any of my limbs, I was advised by a
friend to try Alcock's Porous Plasters. I did
so, and in 15 days I was completely cured,
returning to my work on the City of Buenos
Aires Improvement Co. for Mr. C. Simpson.

This fact is known to hundreds of persons
here. You are at perfect liberty to publish
this, and I trust it will induce others simi-
larly afflicted to try them; they are certain to be
benefited by them.

I remain,
Very truly yours,
W. MURPHY.

Pascals' Mails.

London, Aug. 20th.

In the House of Lords last night several Bills were advanced a stage, and the Earl of Northbrook laid upon the table a memorandum of the changes proposed to be made in the pay and promotion of the Royal Marines.

In the House of Commons, a new writ was ordered to be issued for the Elgin Burghs, Mr. Asher having accepted the office of Solicitor-General for Scotland. The Irish votes were discussed in Committee of Supply.

It is rumored here that the English and Italian Commissioners for the delimitation of the frontier have been captured by brigands, who demand £40,000 as ransom.

Hartmann's intention is to deliver a few lectures in N. York, and then go to Boston and other cities. The New York papers still continue to discuss the question of extradition, the *Tribune* being strongly of opinion that Hartmann should be extradited by international comity in the absence of treaties, if Russia demands it.

The difficulty in regard to the St. Gothard Tunnel, stone time thought to be insuperable, has, it is confidently hoped, been conquered, and that the tunnel will be finished by the end of October.

Two ladies and a gentleman from Holland were killed on Thursday through their carriage falling down a precipice at a part where the road had been washed away by the rain.

The Nile is still rising, and is now higher at Khartoum and Berber than it was last year. All doubts as to a good Nile this year are satisfied. The nomination of candidates at Leeds and Edinburgh will take place on Tuesday, and the polling if any on Friday.

It has been decided that Mr. Herbert Gladstone be returned for Leeds unopposed. He arrived there last evening and addressed a meeting of the Liberal Four Hundred, who congratulated him on his promotion and commended him to the Liberal burghers for re-election. He spoke at some length on the great crisis, saying that the Government were perfectly justified in the course they took, after which he commended the cry for fair trade as a plea for protection in disguise. Mr. Barran, M.P., also spoke.

Colonel Tomline has been selected as the Liberal candidate for North Lincolnshire. Up to last evening no Conservative candidate appeared to have been definitely chosen.

Colonel Joicey, late M.P. for North Durham, was buried yesterday morning at Newton, near Stockton. There was a large assembly, and the remains were followed to the grave by the 1st Administrative Battalion of the Durham Rifles, of which Mr. Joicey was Lieutenant-Colonel.

Mr. Fawcett, M.P., and Mr. J. Holmes, M.P., in acknowledging a letter from a constituent protesting against their votes on the 3d inst. in the case of Mr. Bradlaugh, state that the question on that occasion was whether the Speaker was to be censured for carrying out a resolution of the House. They both pronounced against the resolution itself, and Mr. Fawcett says, "If the motion had been one for allowing Mr. Bradlaugh to take his seat no one would have given it a more cordial support than I should, for it has always appeared to me that nothing can be more unjust than to prevent a duly elected member taking his seat in consequence of any particular opinion he may hold in reference to religion." Mr. J. Holmes says, "As to whether a representative duly elected by a constituency, whatever his religious opinions may be, should or should not be admitted to the House of Commons I have never had any doubt, and on the 26th April I practically voted for the admission of Mr. Bradlaugh."

A deposition from Ramsgate, consisting of Mr. Hobbs, the Rev. Mr. Gilmore, and other gentlemen, waited upon Sir Thomas Brassey, at the Admiralty yesterday, and presented a petition bearing 10,000 signatures, in favor of telegraphic communication being established between lighthouses and the shore, to be used in case of storms, &c. Sir Thomas Brassey promised to give his attention to the matter.

Mr. O. Langley's Vandike beat Mr. Alguise's Beddington in the race for the County Gold Cup at Alexandra Park yesterday, and amongst the other results of the running were the following:—City Handicap, Maid of Orleans; Selling Plate, Shabrack; Mile Plate, Amblerby; Forest Plate Miss Edwards; and Municipal Willer Handicap, Pompeia.

William Nash, who was sentenced to death at the last session of the Central Criminal Court for having caused the death of six persons by setting fire to his house at Nottingham, was yesterday respite during her Majesty's pleasure.

Temperature was yesterday registered at 66 degrees in London and at York, and between 55 and 60 degrees elsewhere. Heavy rain is reported as having fallen in Ireland in the course of the day.

The withdrawal of the sum of £200,000 in gold from the Bank of England for export and the prospect of dearer money caused the stock markets yesterday to close flat. Consols fell to 100½ to 101 for the account, and between 55 and 60 for the account. Heavy rain is reported as having fallen in Ireland in the course of the day.

ROSARIO.

(From our own Correspondent.)

September 16th.

This will be the ninth year that the province of Santa Fe has been plagued with the locust. Prior to 1873 this destructive insect was known in the upper provinces, but only in comparatively small numbers. It is true, however, that in 1870 a 'manga' that had probably gone astray, passed the Arroyo del Medio, and devoured the whole wheat crop of Mr. Oldendorf; but the province of Buenos Ayres, up to the present time, has been singularly exempted from the ravages of the locust; and good Provincianos they did not care to cultivate the acquaintance of the Portenios. I have written so much on this plague that it appears to have been lost to try and wake up the authorities to a sense of their duties. On one occasion I proved by figures that the country had lost more by locusts than it has ever done through Indian raids. In countries where the locust plague exists, in Algeria and the U. States particularly, the authorities are very active, and the result is that the crops are saved and the pest exterminated. But here it has been allowed to increase and multiply to such an extent that the country has become entirely at its mercy, and people work on, accepting the chances of utter ruin. A couple of years ago the locusts invaded the island of Malta and Spain and part of Italy. They were immediately stamped out by the measures taken by the authorities. In the United States the National Government has taken as vigorous measures to exterminate them as it does to protect the country against the depredations of the wild Indians. Here, however, Congress has been very remiss in considering the subject worthy of consideration. In maize alone the locusts destroy yearly to the value of millions of dollars.

In Spain, in one year, five-sixths of the invading locusts were destroyed, and it was calculated that crops to the value of two hundred millions of pesetas were saved. When the National Government was in Parma, measures were taken for the destruction of the locusts, and with an excellent result. The Government declared it obligatory on the killing of the insect, and a sum was voted in order to pay a certain amount per arbo. This was the first attempt made in the country to battle with the pest. But the example was not followed in other parts of the country. I gave you last year a graphic account of how the colony of Bolivia was saved, with a more bagatelle of expenses. Four thousand arrobas of locusts were killed, and if the paltry funds had not become exhausted, four thousand more would have been brought in. The moral to be drawn from this fact is that if the National Government would only grant a certain sum for a few years, the country would be able to stamp out the locusts.

I wonder what object the *Patria Argentina* desires to attain by its sensational memoirs of Mr. Schemmery, published in the columns of the paper. Little is doing as yet to extract minerals, as the new machinery is not yet put in. Their principal shaft is only forty metres deep, and Mr. Edwode writes me it is to be carried to the depth of two hundred metres, even if they have to cut through a stratum of pure gold. Their mines were always rich until the water was put to the labours of the former owners. With the pumping appliances at the mines now this can never occur again.

I go by a paragraph in the paper that in the United States the telephone is to be used in prisons to listen to the secret conversations of the prisoners with their friends or relatives. I think there must be some mistake in this. No people of Anglo-Saxon blood or laws would could be guilty of such a mean and unchristian act. The worthy act of English Law is to insist on the criminal not committing himself, if he is in on confessing, well and good, but he is never asked to, or traps me it is to be carried to the depth of two hundred metres, even if they have to cut through a stratum of pure gold. Their mines were always rich until the water was put to the labours of the former owners. With the pumping appliances at the mines now this can never occur again.
